Stack of sheets of polyethylene, with a specially treated sensitive adhesive on one side, upon which persons entering a clean room or clean zone walk to remove the last trace of contamination on shoe heel and soles, and on wheels. When a sheet becomes loaded with contamination, it is peeled off, exposing a new clean sheet

## **Sticky Mat**

### **Physical properties :**

**Film material : Low Density Polyethylene (LDPE)**

**Film Thickness/Layer : 30 $\mu$  (+/- 10%)**

**Rupture elongation : > 250%**

**Tensile strength : > 170 kg/cm<sup>2</sup>**

**Adhesive : Polyacrylate**

**Adhesive force : 300gram/25mm; 500 gram/25mm; 800 gram/25mm**

**Adhesive hardener : Isocyanate**

**Adhesive tack: middle tack**

**Re-solvent : Ethyl Acetate**

**Packing: 8 mats/ctn white carton,30layers/mat**

**Color : Blue, White**

**Standard size : 24\*36"**

**Packaging : 30 sheets per mat / 8 mats per carton;**
